

Inglorious Geeks - Episode 1

- 1) Greetings – We’re noobs at this. Hah.
 - a. Talk about members
 - b. What we’re about
 - c. Where we want to go
- 2) Jason’s Corner
 - a. Blizzard’s blue posts
 - i. New legion beta changes
 1. Performance changes in Legion
 - a. Better distance
 - b. New graphics options (LOD – Level of Detail)
 - c. Polygon counts
 - d. New 1 to 10. We’re currently at 3
 2. Transmogrification Collection
 - a. Diablo like
 - b. Data mining what you had
 3. Respec cost removed
 - ii. New current changes
 1. New Transmog items
 - a. Alliance – Lion’s Fang & Lion’s Heart
 - b. Horde – Blood Guard’s Cleaver & Staff of Gul’dan
 - iii. Overwatch
 1. Having fun but like League of Legends requires a learning curve to address specific countering of other players abilities based on my limited game play and from various reviews of the game.
 2. Love the position helper letting people know what roles need filled.
 3. Overall I feel there isn’t much outside of Quick Play, where you randomly get the maps and modes you might like, and Weekly Brawl which changes up the rules a little bit. It is in its early infancy, maybe rushed but I still enjoy the quick game play.
 4. Thousands of cheaters have been banned. In china, those banned have been called out by name.
 - b. 3D printing
 - i. In search of practical purposes
 1. Ant trap
 2. Toothpaste squeezer
 - ii. Wow 3D import
 1. Wow model viewer – export to an .obj file
 2. Open .obj file in windows 10 3D Builder which can export to a .stl file.
 3. I’d recommend increasing the size of the model at least 1.5x to 2x the size so smaller parts are present.
